

Scaled QB / Q0 standalone

publication schematic · input = 68.4 μA

Q0 scaled: $L_{\text{in}} = 0.8 \text{ pH}$ · $L_1 = L_2 = 3.91 \text{ pH}$ · $L_0 = 1.323 \text{ pH}$ · $J_s I_c \approx 50 \mu\text{A}$ · $JL1 I_c \approx 36 \mu\text{A}$ · $JL2 I_c \approx 54 \mu\text{A}$ · $R_B = 6 \Omega$

Black = QB core; gray dashed branch = retained top-level 10 Ω output-load boundary.
